Subject: A+ Class is open (Early)

Hi all,

I hope you're doing well and ready for the new term. I've opened our course early to give you a head start. This class covers a significant amount of material, and working ahead is the best strategy to ensure you have time to study and pass.

To help us all stay on track, here are the "Rules of the Road":

1. Trust the Calendar: Assignments are due on the dates listed in the Syllabus. Do not rely on memory; use your calendar.
2. Discussions: These are time-sensitive. If you miss a discussion, it cannot be made up as the class moves forward together.
3. Late Certificates: If you miss a certificate deadline, upload it ASAP. No need to ask for permission—just upload it.
4. Read the Syllabus: This is your primary resource for all dates and requirements.
5. Required Material: You must purchase the uCertify material to complete this course. Check the syllabus/announcements for a discount link.

Pro-tip: Work ahead now to save yourself stress later. Repeat after me: "I will not wait until the last minute!"

Let's have a productive term. Stay safe and healthy!

Rick Vargas
